Story Champs® is a multi-tiered language intervention curriculum that helps educators and clinicians promote academic language of diverse students. Although the primary focus of Story Champs® is on the development of a strong oral language foundation through storytelling, it also promotes other aspects of academic language that are essential for school success through information retelling, vocabulary, inferencing, and writing.

As a multi-tiered curriculum, Story Champs® lessons can be differentiated for any student or group of students. The advantage of aligned tiers is that students with greater language needs receive more intensive intervention whereas students with fewer needs participate in a low dose intervention that is sufficient to support their academic language development.

Ideally, a classroom teacher delivers lessons in the large group setting while a special educator, literacy specialist, or paraeducator delivers small group or individual lessons. Importantly, the curriculum adheres to the same principles and instructional approaches across all tiers so students who move between the tiers are not confused by conflicting approaches.
